AMICUS BRIEF OF THE STATE OF TENNESSEE  
IN SUPPORT OF UNITED STATES

---

INTEREST OF AMICUS STATE

The State of Tennessee, its Governor, the Tennessee Board of Regents, the University of Tennessee, and the Tennessee Higher Education Commission, as defendants in the higher education desegregation case now styled

*Geier v. McWherter*, have definite and substantial interest in the outcome of this case. One basis of the petitions for certiorari by the United States and by petitioners Ayers, et al., is that the Fifth Circuit's ruling in this case is in conflict with the law of the Sixth Circuit as set forth in *Geier v. University of Tennessee*, 597 F.2d 1056 (6th Cir. 1979) and *Geier v. Alexander*, 801 F.2d 799 (6th Cir. 1986). The decision in this case will have direct effect on the Tennessee desegregation litigation in *Geier*.

Tennessee can provide assistance to this Court in this case because of Tennessee's experience in *Geier* over the last twenty-three years.

---

### STATEMENT OF THE CASE

The amicus state adopts the statement of the case as presented by the United States in its petition for certiorari

---

### SUMMARY OF ARGUMENT

The duty of a state which formerly operated a segregated system of higher education in violation of the Fourteenth Amendment to the United States Constitution is to cease the discrimination and to eliminate the present effects of that past discrimination. The scope of a state's remedial duty in this context is determined by the scope of the state's constitutional violation.

No set rules are applicable to every situation. However, a system of higher education has fulfilled its constitutional duty when:

- all facilities are equal,
- program duplication has been eliminated at formerly white and black institutions in the same geographical area,
- admission requirements do not perpetuate substandard academic quality at formerly black institutions,
- governing boards are integrated,
- affirmative action in hiring and promotion decisions have produced results and promise to continue to do so.

---

◆

## ARGUMENT

### I. THE SCOPE OF THE DUTY UNDER THE FOURTEENTH AMENDMENT TO THE UNITED STATES CONSTITUTION OF A STATE WHICH OPERATED A DE JURE SEGREGATED SYSTEM OF HIGHER EDUCATION INCLUDES ELIMINATING THE PRESENT EFFECTS OF PAST SEGREGATION.

It is the position of the amicus state that the duty of a state which formerly operated a de jure segregated system of higher education is not solely controlled by either *Green v. County School Board*, 391 U.S. 430 (1968) or *Bazemore v. Friday*, 478 U.S. 385 (1986). Rather, the duty of a state which operated a segregated system of higher education in violation of the Fourteenth Amendment is controlled by *Louisiana v. United States*, 380 U.S. 145 (1965).

The duty of a court to fashion remedies in race discrimination cases brought under the Fourteenth Amendment was stated in *Louisiana v. United States*, 380 U.S. at 154. In this voting rights case, this Court stated that "the [district] court has not merely the power but the duty to render a decree which will so far as possible eliminate the discriminatory effects of the past as well as bar like discrimination in the future." This aspect of the decision has been applied in a variety of other Fourteenth Amendment race discrimination cases.

In the context of desegregation of public elementary and secondary education, this Court relied upon *Louisiana* in *Green v. County School Board*, 391 U.S. at 438. In *Green*, the Court noted *Louisiana* and held that *Brown v. Board of Education*, 349 U.S. 294 (1955) (*Brown II*), commanded that "state-compelled dual systems were . . . clearly charged with the affirmative duty to take whatever steps might be necessary to convert to a unitary system in which racial discrimination would be eliminated root and branch." *Green*, 391 U.S. at 438. *Green* held that a "freedom of choice" plan for students was not an end in itself but rather a means to a constitutionally required end of segregation and its effects. Where a "freedom of choice" plan did not produce the desired effects, something more was required. *Id.*, 391 U.S. at 439.

This Court also relied upon *Louisiana* in *U.S. v. Paradise*, 480 U.S. 149, 183 (1987) for the proposition that a district court has the duty to render a decree which will eliminate the discriminatory effects of the past. *Paradise* was a race discrimination in employment case brought under the Fourteenth Amendment. In *Paradise*, this Court upheld a court-ordered race-conscious affirmative action

plan designed to redress past race discrimination in hiring and promotion by the Alabama Department of Public Safety. In fact, this Court stated: "The government unquestionably has a compelling interest in remedying past and present discrimination by a state actor." *Id.* at 167.

In the landmark case of *Brown v. Board of Education*, 347 U.S. 483, 495 (1954) (*Brown I*) this Court concluded that "in the field of public education the doctrine of 'separate but equal' has no place. Separate educational facilities are inherently unequal." This Court concluded that segregated education deprived black students of equal protection of the laws guaranteed by the Fourteenth Amendment. This Court in *Brown I* referred generally to "public education" and no one can seriously dispute that this doctrine applies with equal force to public post-secondary education.<sup>1</sup>

In *Brown II*, 349 U.S. at 301, this Court noted that school systems must "effectuate a transition to a racially nondiscriminatory school system." In this context, the Court mentioned the physical condition of school plants, the school transportation system, personnel, and a system of determining admission to public schools on a non-racial basis. *Id.*

---

<sup>1</sup> In *Brown I* this Court discussed several prior cases dealing with segregation in higher education. Specifically it was noted that in *Sweatt v. Painter*, 339 U.S. 629 (1950), the question whether *Plessy v. Ferguson*, 163 U.S. 537 (1896) should be held inapplicable to public education was expressly reserved.

It would be illogical and contrary to all precedent to say that this same duty does not apply to race discrimination in public higher education. A state which in the past operated a de jure system of higher education has a duty under the Fourteenth Amendment to eliminate the present effects of that past discrimination.

In *Geier v. Alexander*, 801 F.2d 799 (6th Cir. 1986) the Sixth Circuit upheld a pre-professional program for black undergraduate students. The Court distinguished *Bazemore* based on the greater value of advanced education as compared with high school clubs. This reasoning of the Sixth Circuit was criticized by the Fifth Circuit in *Ayers v. Allain*, 914 F.2d 676 (5th Cir. 1990).

It is true that states have great interest in the education of their citizens. See *Brown I*. However, the source of the duty to remedy present effects of past de jure segregation does not rest on the relative merits of elementary and secondary education compared with post-secondary education. The source of the duty is the Fourteenth Amendment as interpreted in *Louisiana* and the compelling interest of the state in remedying past and present discrimination by a state actor.

This Court's decision in *Bazemore* is not inconsistent with this line of cases. In *Bazemore*, this Court held in a Title VII claim that the state was required to remedy present racially discriminatory salaries resulting from past race discrimination. *Bazemore*, 478 U.S. at 397. With regard to 4-H and Extension Homemakers Clubs for high school students, the Fourth Circuit had found that there was no evidence that anyone was denied membership or services or provided inferior services because of their

race. *Bazemore v. Friday*, 751 F.2d 662 (4th Cir. 1984). This Court noted that there was no current violation of the Fourteenth Amendment since prior discriminatory practices had been discontinued and a neutral admissions policy adopted. *Bazemore*, 478 U.S. at 408. In essence, all discrimination and its effects caused by the *state* had been remedied. There was no proof of racially-biased services or admission requirements.

*Bazemore* is factually distinguishable from formerly de jure segregated state systems of higher education. In higher education, the "disease" of de jure segregation can be much more widespread and include inferior facilities, segregated faculties, program duplication, and differing student admission requirements. None of these factors were present in *Bazemore*. For these reasons, it is the suggestion of the amicus state that it is the duty of a state which operated a de jure system of higher education in violation of the Fourteenth Amendment to cease the discrimination and to remedy the present effects of the past discriminatory actions.

## II. THE SCOPE OF A STATE'S REMEDIAL DUTY IS DETERMINED BY THE SCOPE OF THE STATE'S CONSTITUTIONAL VIOLATION.

It is the position of the amicus state that the duty to remedy the present effects of past illegal discrimination is satisfied when the state has placed in compliance with the Fourteenth Amendment the aspects of the system under the state's control. While a determination of compliance will depend on the facts of each case, general guidelines can and should be drawn by this Court.

The state or other body which originally imposed de jure segregation has the affirmative obligation to remedy the effects of that discrimination. Judicial authority enters only when the state or local authority defaults. It is well-established with equity cases that the nature of the violation determines the scope of the judicial remedy. *Swann v. Charlotte-Mecklenburg Board of Education*, 402 U.S. 1, 16 (1971). This principle is tied in part "to the necessity of establishing that school authorities have in some manner caused unconstitutional segregation, for 'absent a constitutional violation there would be no basis for judicially ordering [a remedy].'" *Pasadena City Board of Education v. Spangler*, 427 U.S. 424, 434 (1976) citing *Swann*, 402 U.S. at 28. Thus the scope of the remedy must be determined by looking at the nature of the original constitutional violation by the state.

Various courts have noted the differences between elementary and secondary education on the one hand and higher education on the other. See *Geier v. University of Tennessee*, 597 F.2d 1056, 1065 (6th Cir. 1979), cert. denied, 444 U.S. 886 (1979); *Alabama State Teachers Association v. Alabama Public School and College Authority*, 289 F.Supp. 784 (M.D. Ala. 1968), aff'd per curiam, 393 U.S. 400 (1969).

One is free and compulsory and pupils are assigned to particular schools. The other is purely elective, requires the payment of tuition and fees, and permits students to choose a particular school for a variety of reasons. Most elementary and secondary schools are roughly equal in curriculum and facilities whereas individual colleges and universities vary greatly in their offerings and emphasis.

*Geier v. University of Tennessee*, 597 F.2d at 1065. Generally, faculty members in higher education institutions cannot be reassigned to a different institution. Furthermore, higher education operates on a statewide or regional basis rather than on a local basis. Higher education programs vary from institution to institution and are not uniform.

These differences, however, do *not* result in a lesser duty to remedy the present effects of past discrimination. Rather, these distinctions mean that different remedies must be utilized. *Geier v. Alexander*, 801 F.2d at 802. Bodies responsible for public higher education do generally have control over the quality of the facilities, the mission statements of each institution, the programs and degrees offered by each institution, student entrance requirements, and funding. Affirmative action can be utilized by each institution in recruiting and hiring faculty and staff and in student recruitment.

Perhaps the most vivid example of the effectiveness of court-ordered desegregation remedies in the context of higher education can be found in Tennessee. In Tennessee, the present effects of past *de jure* segregation have been eliminated to a large extent.

Like elementary and secondary education in many states, post-secondary education in Tennessee, Mississippi and elsewhere was once racially segregated by law. In Tennessee, the sole institution for higher learning operated by the state for African-Americans was Tennessee State University (hereinafter "T.S.U.") (formerly Tennessee Agricultural and Industrial State University). *Sanders v. Ellington*, 288 F.Supp. 937, 940 (M.D. Tenn. 1968). The

state statute creating T.S.U. stated that its purpose was " . . . to train negro students in agriculture, home economics, trades and industry, and to prepare teachers for the elementary and high schools for negroes in the state." *Geier v. Blanton*, 427 F.Supp. 644, 645 n. 2 (M.D. Tenn. 1977) citing Tenn. Code Ann. §49-3206. Compulsory racial segregation in all Tennessee institutions of higher learning was first mandated by Article II, §12 of the Tennessee Constitution of 1870. In 1901 Tennessee became the first state to enact criminal statutes requiring racial segregation in all public and private colleges. *Geier v. University of Tennessee*, 597 F.2d at 1058 n. 1. As the district court noted in 1968:

Prior to the Supreme Court decision in *Brown v. Board of Education* in 1954 the public educational system in Tennessee operated under one-half of the decision of the Supreme court in *Plessy v. Ferguson* of 1896 . . . The races were certainly kept separate in the schools; but I would assume that no one would argue in good faith that the schools were equal.

*Sanders v. Ellington*, 288 F.Supp. at 939.

Desegregation of Tennessee higher education has been under the Court's jurisdiction since 1968 – twenty-three years. This litigation resulted in an order to merge Tennessee State University, the formerly black school in Nashville, with University of Tennessee Nashville – a predominantly white school about five miles from T.S.U. *Geier v. Blanton*, 427 F.Supp. 644 (M.D. Tenn. 1977), *aff'd Geier v. University of Tennessee*. This was permissible, according to the Sixth Circuit, because the defendants had failed to dismantle the state-wide dual system, the

"heart" of which was an all black T.S.U. *Geier v. University of Tennessee*, 597 F.2d at 1067.

In 1984 all the parties to the litigation with the exception of the United States entered a "Stipulation of Settlement" which was approved by the Court. The Stipulation is reported in *Geier v. Alexander*, 593 F.Supp. 1263, 1267 (M.D. Tenn. 1984), *aff'd* 801 F.2d 799 (6th Cir. 1986). This Stipulation addresses student recruitment and retention, open admissions to two-year institutions, changes in admission and retention requirements for four-year schools and racially identifiable institutional image. In the area of employment, the Stipulation requires that other race employment goals be set for each institution and that a variety of programs be implemented to train, recruit, and employ other race faculty and administrators. The Stipulation also addresses Tennessee State University and the two other four-year institutions in Middle Tennessee. It provides for improvement in the facilities at T.S.U., elimination of program duplication, and enhancement of program offerings at T.S.U.

Significant effort has been made by the State of Tennessee under this stipulation and the results have been dramatic. By fall, 1990 nearly \$39,000,000 had been appropriated to fund an ambitious master plan to improve the facilities at T.S.U. An additional \$9,000,000 was recommended for fiscal year 1991 to fund other desegregation activities under the Stipulation. (1991 Desegregation Progress Report, Table 17, Reproduced as Appendix A). Almost all formerly white colleges and universities employed black faculty and administrators roughly in proportion to their availability. More than half of the

formerly white schools had met their goals in black student enrollment. (1990 Desegregation Progress Report, Table 1, Reproduced as Appendix B). The entire 1990 Desegregation Progress Report has been filed with this Court for its consideration.

In hearing this case, this Court should consider not only defining the duty of public higher education to desegregate but also when that duty has been satisfied. Under this Court's recent decision in *Board of Education of Oklahoma City Public Schools v. Dowell*, 111 S.Ct. 630, 638 (1991), a court's jurisdiction over a desegregation case can be ended when there has been good faith compliance with the desegregation decree and when the vestiges of past discrimination have been eliminated to the extent practicable. Judicial tutelage for the indefinite future is not required.

Although no set rules applicable to every situation can be made, the amicus state urges that the parameters of the legal duty to desegregate be defined.

1. The state need only remedy the present effects of past *state* imposed segregation.
2. There is no constitutional right to a particular degree of racial balancing or mixing. *Pasadena*, 427 U.S. at 434; *Swann*, 402 U.S. at 24.
3. Affirmative action and race-conscious remedies cannot be used to maintain any particular racial balance. *United Steelworkers, etc. v. Weber*, 443 U.S. 193, 208 (1979); *Johnson v. Transportation Agency, Santa Clara County, CA*, 480 U.S. 616, 630 (1987).

4. A system of higher education may be declared unitary and a desegregation case dismissed when:

- all facilities are equal,
- program duplication has been eliminated at formerly white and black institutions in the same geographical area,
- admission requirements do not perpetuate substandard academic quality at formerly black institutions,
- governing boards are integrated,
- affirmative action in hiring and promotion decisions have produced results and promise to continue to do so.

The position of the amicus state is that a state's duty to desegregate higher education should be determined by the scope of the state's violation. The parameters of that duty under the Fourteenth Amendment and when that duty has been met would help guide state higher education systems and the court.

---

◆

## CONCLUSION

Based on the foregoing authorities and analysis, the amicus state urges this Court to reverse the decision of the United States Court of Appeals for the Fifth Circuit and hold that a state has a duty under the Fourteenth Amendment to remedy the present effects of past segregation in higher education. The amicus state also urges

this Court to give general guidelines for states and courts as to how this duty might be satisfied.

Respectfully submitted,

CHARLES W. BURSON

In addition to the amounts shown above: (1) For FY87, \$5,225,000 was recommended for capital projects at TSU. For FY88, \$746,000 was recommended for Campus Outside Improvements at TSU, \$137,000 was recommended for Outside Lighting Installation at TSU. For FY89, \$15.0 million was recommended for TSU capital outlay projects. For FY 90, \$22.0 million was recommended for TSU capital outlay projects, and for FY 91, an additional \$24.5 million is recommended. For FY 92, the Commission has recommended funding for TSU capital outlay projects totaling \$24.2 million. (2) For FY86, an increase of \$2 million was recommended for TSAC funding and that amount addresses some of the concerns raised in *Geier* provision IIG.

\* The program was expanded to include pharmacy in FY 88. In FY 90, at ETSU and UTMphs, the Black Conditional Grant Program became a Black Tennessean Scholarship Program. The original program will remain in effect at Meharry, \$310,000, and Vanderbilt, \$20,000, for FY 91 and 92.

Note: The Regional Minority Teacher Education Program is recommended for third-year funding elsewhere for \$250,000.

NOTE: Employment data for Tennessee Board of Regents institutions are based upon October revised budgets. UT data as of October 1, 1990. Unrestricted full-time employment data have been included for 1990. For UT fall 1988 and 1989 data included all employees.

\* Refinement based upon 1986 projections. If met, college-going disparity will have been addressed.

\*\* Includes UTSI.

\*\*\* Beginning fall 1987 at TSU, reclassification of some positions was made from administrators to professional.

\*\*\*\* Other race here means black for all institutions except TSU and SSCC. For TSU and SSCC it means white.
